

# Investors Title

INNOVATIVE BY INSTINCT

## Internet Explorer Tips

Investors Title's website is optimized for IE 9 and above. If you experience difficulties accessing the site on a version earlier than IE 8, please upgrade to a supported version.

**Internet Explorer Compatibility View:**  "Compatibility View" is a feature which helps when viewing older sites on a newer browser version. Unfortunately, this setting will sometimes act undesirably with new sites that are designed to work well in the latest browser versions. **This feature, found next to the address bar, should be disabled to view the Investors Title website as it is intended.**

**Deleting History:** whenever making a change to the browser settings, such as disabling the compatibility view, clearing the browser history is advised. Clearing the history also assists with ensuring the most recent version of the website is being loaded. To clear the history in Internet Explorer go to:

Tools | Internet Options | Delete Browsing History

If options are made available, include temporary internet files, history, and download history in the items to be deleted.

Once history has been deleted, it is good practice to close and reopen the browser.

**Viewing the Most Current Pages:** pressing Control + F5 will refresh a page with the most current version.

**If you experience difficulties viewing Investors Title's website, please forward a description of your experience, along with the browser type and version number (often found under Help | About) to [webmaster@invtitle.com](mailto:webmaster@invtitle.com).**
